

Problem Set SQL

Use the Table “Players.xlsx”, create the following queries.

Notice: You only need to submit this exam sheet, no need to submit the Access File or the results of the queries. It is recommended to test whether your queries are correct by Access.

1. Find the number of players whose college is “Duke University”. (4 points)

Solution

Select count(*) from players where college='Duke University';

2. Find the names of players whose weight is equal to or larger than 140. (2 points)

Solution

Select name from players where weight>=140;

3. Find the names of the top 5 highest players. (3 points)

Solution

Select top 5 name from players order by height desc;
